

Determining Which Policies are Assigned to Which Group

You can view policy and group assignments from the **Manage > Policies** or **Manage > Groups** page.

Viewing What Policies Are Associated With a Group

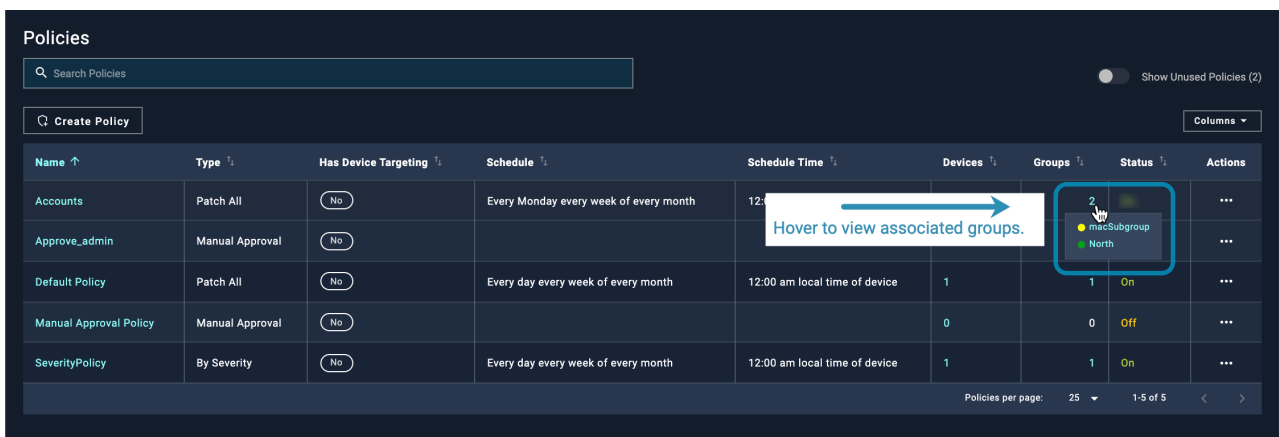

You can view which policies are associated with a group.

1. Go to the **Manage > Groups** page.
2. To view associated policies, hover over the number in the **Policies** column.
3. You can also view associated policies from the Edit Group page. Click the name of the group to open the Edit Group page. Associated policies are listed on the right.

Viewing What Groups Are Associated With a Policy

You can view which groups are assigned to a policy.

1. Go to the **Manage > Policies** page.
2. To view associated groups, hover over the number in the **Groups** column.

3. You can also view associated groups from the **Edit Policy** page. Click the name of the policy to open the **Edit Policy** page. Associated groups are listed on the right.

Run Policy

While you are viewing the Policy associations, you can decide to immediately run the policy.

1. From the **Policies page**, click **Actions** for the policy you want to run.
 2. To immediately execute the policy, click **Run Policy**.
 3. Confirm by clicking **Run Policy**.
- A message confirms that the policy is scheduled for immediate remediation.

Note: If you choose to run a policy manually, notifications will not be sent to the users. If notifications are required, we recommend creating a schedule instead.
