

# Patching Notepad++ on Windows

Last Modified on 10/11/2020 11:38 pm EDT

When the text editor Notepad++ is running, an attempt by Automox to patch will fail. Notepad++ must be closed for a successful update. The patch will be updated the next time the policy runs, if the editor is not running.

**NOTE:** Notepad++ does not automatically save your changes. There is no guarantee that your unsaved data will be available after a patch.
