

Week in Review - Release Notes for Week Ending 6/5/2020

Last Modified on 12/18/2020 8:48 pm EST

Bug Fixes:

- Fixed bug where LibreOffice was updating when app is open (6/2)
- Fixed issue where the current version of Zoom Outlook Plugin was misreported on Windows (6/4)
- For those customers who have contacted Automox Support about imposing a limit on the number of devices allowed for their account, the Add Devices modal now displays the current limit and number of currently installed devices. (6/5)

Enhancements:

- Minor updates to scripts to help ensure customer security and confidence when installing software through our example Worklets (6/1)
 - Improved pre-packaged screensaver worklet to work with Windows 10 (6/3)
 - We're in the process of updating our console to make it more modern and more maintainable. Look for new icons and fonts. (6/3)
-
