

2020.04.13-01 Release Notes

Last Modified on 12/18/2020 9:27 pm EST

Introduced new verbiage including Scheduled Patches, Impacted Devices, and Updated Devices along with minor bug fixes

Bug Fixes:

- Changed the advanced policy creation form so that the user doesn't receive a "No Schedule Set" warning each time they preview packages in scope
- Fixed a UI issue where text overflowed inside policy creation buttons
- Error messages related to activity log were broken and wouldn't display. Now they display

Enhancements:

- "Pending Patches" are now called "Scheduled Patches" on the device page table
 - On the software page, "Patch Available" is now called "Impacted Devices" and "Patch Installed" is now "Updated Devices." The corresponding numbers link to the corresponding devices on the device page
-
