

# Profile

You can manage your profile and notification settings from the Profile page.

Select the **Settings > Profile** tab to manage the following details:

- Make changes to your profile information, such as name and email address.
- Change your password.
- Manage email notifications. You can select to receive email notifications for the following:
  - Device addition
  - Device removal
  - Successful patch application
  - Patch failure
  - Weekly digest of Automox activity
- Add Slack notifications.

The screenshot shows the 'Settings' page with the 'PROFILE' tab selected. The page is divided into three main sections: Profile Information, Change Password, and Notifications.

**Profile Information:** Contains three input fields: 'First Name\*', 'Last Name\*', and 'Email Address\*'. Each field has a small eye icon to the right, indicating a toggle for visibility.

**Change Password:** Contains three input fields: 'Current Password', 'New Password', and 'Repeat Password'. Each field has a small eye icon to the right, indicating a toggle for visibility.

**Notifications:** Contains two columns of checkboxes. The left column is labeled 'EMAIL' and the right column is labeled 'SLACK'. Both columns have the same five notification types: 'Devices Added to Automox', 'Devices Removed from Automox', 'Devices Successfully Patched', 'Devices Failed to Patch', and 'Weekly Digest of Automox Activity'. The 'EMAIL' checkboxes are all checked, while the 'SLACK' checkboxes are all unchecked. Below the checkboxes, there are fields for 'Installed By:' and 'Slack Team:'. A link 'Click here to reinstall or change the channel' is present, along with a red 'Disable Slack' button. At the bottom right of the page, there are two buttons: 'Update Profile' and 'Cancel'.
